U.S. ENVIRONMENTAL PROTECTION AGENCY
OFFICE OF RADIATION PROGRAMS
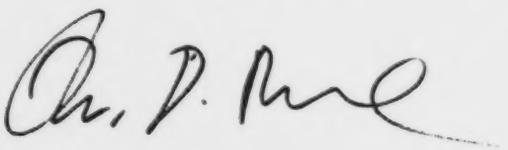
TECHNOLOGY ASSESSMENT DIVISION

FOREWORD

The Office of Radiation Programs carries out a national program designed to evaluate the exposure of man to ionizing and nonionizing radiation, and to promote development of controls necessary to protect the public health and safety and assure environmental quality.

Within the Office of Radiation Programs, the Technology Assessment Division is conducting a review program to evaluate data on radioactive effluents from light-water-cooled nuclear power plants. The data consolidated in this report will be used in the technology assessment of current radioactive waste managemnet processes, to identify sources with inadequate controls, in partly fulfilling the Agency's responsibility under the Clean Air Act, and to assess public and private compliance with Agency radiation standards, guides and criteria. It is the intent of this report to provide a summary of the effluent data, from light-water-cooled nuclear power plants, which will be used in all EPA technology assessment reports.

I encourage users of this report to inform the Office of Radiation Programs of any omissions or errors. Your comments are also solicited.



W. D. Rowe, Ph.D.
Deputy Assistant Administrator
for Radiation Programs

Introduction

Purpose

This report is the second in a series of annual summaries of radioactive waste being released from, or shipped off-site by, nuclear power plants in the United States. The report will provide a consolidated source of data for an annual report on radiation in the environment published by the Environmental Analysis Division of the Environmental Protection Agency's (EPA) Office of Radiation Programs (ORP).

The data consolidated in this report will be used by ORPs Technology Assessment Division (TAD) to assess the status of current radioactive waste management processes, to project future trends in process performance, to identify sources with inadequate controls and to partly fulfill the Agency's responsibilities under the Clean Air Act. These reports will be used by TAD to develope the technical bases for possible environmental standards to be written by the Criteria and Standards Division of ORP.

This report is not to be construed as a compliance report for the EPA Uranium Fuel Cycle Standard (40 CFR 190). Responsibility for assuring compliance with this standard is vested in the U.S. Nuclear Regulatory Commission under the President's Reorganization Plan No. 3 of 1970.

This report will cover only those long lived isotopes which are generally released in sufficient quantities to be environmentally significant over extended periods of time in the biosphere.

Scope

EPA is maintaining records of the releases of radioactive effluents and wastes from all operating nuclear power plants. This particular report

includes those plants which reached commercial operation, or had measurable releases prior to commercial operation, as of December 31, 1976, and includes only those isotopes of environmental and radiolodical signifiance.

Source of Data

All of the information in this report was taken from the individual plant semi-annual or annual operating reports filed by the responsible utility with the Nuclear Regulatory Commission unless otherwise noted. Copies of these reports are forwarded to the EPA Headquaters, in Washington D.C., and to the EPA Regional Office for the region in which the plant is located.

It is our hope that anyone having access to data which we are missing, have marked as NR, not reported, or NA, not available, would provide us with documental reports of such data so that it may be included in subsequent reports. Blanks in the data sheets indicate missing data.

Definitions

All releases are via the main stack and the discharge canal unless otherwise noted; vent releases are included when given. Terms used in the report are as follows:

Noble Gas - All noble gases at the point of discharge as reported by the licensee.

Halogens - All halogens at the point of discharge as reported by the licensee.

Particulates - Only those particulates with half-lives greater that eight days when reported as such, otherwise all particulates as measured at the point of discharge.

Airborne Tritium - All tritium reported released in gaseous form.

Total MF & Act. Products - Mixed fission products and activation products released via the liquid waste processing system, untreated turbine building drains and secondary system blowdown.

Liquid Tritium - All tritium reported released in liquid form.

Dissolved Gases - All noble gases reported as being released dissolved in liquid effluents.

Liquid Waste Volume - The volume of liquid effluents from all sources.

Liquid Dilution Volume - The volume of liquid into which the liquid effluents are discharged prior to release to the environment

Solid Waste Volume - The volume of solid process wastes such as filter sludge, evaporator bottoms, spent resin, etc., shipped off-site. Does not include tools, medical isotopes, spent fuel and other non-process wastes shipped off-site.

Solid Waste Activity - The total radioactivity associated with the solid waste defined above as being shipped off-site.

Solid Waste Shipments - The number of shipments required to transport to the burial site the volume of solid process wastes defined above.

Power Production - The gross thermal power produced by the plant during the year.

NA - not available

ND - not detectable

NR - not reported

1.26E+3 = 1.26×10^{3}

1.26E-3 = 1.26×10^{-3}

Values printed in *italics* have been revised, and are corrected values relative to the previous years report.

Discussion

Data reported by the utilities on the radioactive material released from the plants was reviewed in order to identify obvious mistakes such as typographical errors. When obvious mistakes were found they were corrected. Other more obscure errors or inconsistencies were handled by contacting either the utility of the plant for assistance. In most cases our inquiries were greeted with a courteous and prompt response.

We have attempted to incorporate all changes and corrections to the data which have been published in subsequent reports by the utility. We would appreciate being notified of any such corrections which we have missed for inclusion in later reports. Please direct this information to:

TABLE 36 (Continued)

SUMMARY OF IODINE 131 RELEASES IN AIRBORNE
EFFLUENTS FROM PWRs FOR 1973 TO 1976

Multi Units	Releases in Curies			
	1973	1974	1975	1976
Point Beach 1 & 2	.0107	.0531	.0241	.00244
Surry 1 & 2	.0422	.102	.116	.283
Turkey Point 3 & 4	.0547	3.41	.416	.347
Oconee 1, 2 & 3	.0123	.0317	.00887	.125
Zion 1 & 2	6.70E-7	.0142	.134	.0764
Prairie Island 1 & 2	1.34E-5	4.49E-4	.0184	.0112
Indian Point 2 & 3	2.90E-4	.369	.365	.214 [3]
Calvert Cliffs 1 & 2	--	8.32E-4	.0219	

[3] Includes Unit 1

TABLE 37

SUMMARY OF COBALT 58 RELEASES IN LIQUID
EFFLUENTS FROM PWRs FOR 1973 TO 1976

Single Units	Releases in Curies			
	1973	1974	1975	1976
Yankee (Rowe)	ND [1]	1.21E-4	6.53E-4	2.46E-5
Indian Point 1	.0321	.123	.0971	[3]
San Onofre 1	1.31	.353	.270	1.07
Haddam Neck	.757	.423	.328	.0137
Ginna, R.E.	.00327	.0135	.00929	.0380
Robinson, H.B.	.0846	.215	.105	.0312
Palisades	10.2	.701	.149	.208
Maine Yankee	.0262	.282	.23	.131
Fort Calhoun 1	4.69E-5	.135	.163	.137
Kewaunee	--	< .291 [2]	.194	1.63
Three Mile Island 1	--	.0179	.0518	.0657
Arkansas One 1	--	.033	1.94	3.39
Rancho Seco 1	--	ND	2.87E-4	0 [4]
Cook, Donald C 1	--	--	.159	.0753
Millstone Point 2	--	--	.014	< .117
Trojan	--	--	--	1.45
St Lucie 1	--	--	--	.0577
Beaver Valley	--	--	--	.124
Salem 1	--	--	--	ND

[1] June to November only
[2] Calculated value based on concentration of < 1.0E-5 μCi/ml for March to June
[3] Included with Units 2 & 3
[4] All liquid waste trucked offsite

TABLE 37 (Continued)

SUMMARY OF COBALT 58 RELEASES IN LIQUID
EFFLUENTS FROM PWRs FOR 1973 TO 1976

Multi Units	Releases in Curies			
	1973	1974	1975	1976
Point Beach 1 & 2	2.07E-4	.00125	.335	.214
Surry 1 & 2	.0443	1.93	2.46	6.33
Turkey Point 3 & 4	.0109	.157	.208	.329
Oconee 1, 2 & 3	.485	.468	2.21	2.01
Zion 1 & 2	ND	.0049	.0038	ND
Prairie Island 1 & 2	ND	.00026	.402	< .0183
Indian Point 2 & 3	2.31 [5]	1.35	.469	.415 [6]
Calvert Cliffs 1 & 2	--	NR	.563	

[5] Co-58 releases reported is greater than total release
[6] Includes Unit 1
